

## FREQUENTLY ASKED QUESTIONS

### **Can Raptivity be used with my existing Course Creation Systems, LCMS and Live Collaboration Systems?**

Yes! Once an interactivity is created using Raptivity, you can embed it with hundreds of authoring tools, LCMS, LMS, CMS and live collaboration systems with zero effort.

### **Does Raptivity offer any solution for technical training?**

Yes. Raptivity Standard Pack 3 is specifically designed for technical training. A variety of interaction models are specifically designed for software technical training. These interaction models include Show me, let me try, zoom effects, rollovers, and dozens more.

### **Do you offer volume discount for corporates?**

Yes. We offer volume discount on purchase of 5 or more licenses by corporates.

### **Does Raptivity allow branding of interactivities per my corporate colours and fonts?**

Yes, Raptivity allows you to create your own custom branded versions of the interaction models, and store them under "My Examples". These interaction models can then be re-used without having to do the repetitive task.

### **Can Raptivity output play without any proprietary plug-ins?**

Yes. The output of Raptivity can be a single flash file, which plays without the need of any propriety plug-ins.

### **Can the interactivities which are created using Raptivity be tracked using a LMS?**

Yes. The core pack that ships with Raptivity has an interesting category of interaction models which includes SCORM trackable assessments. You can track these assessments using any SCORM compliant LMS including Blackboard, WebCT, SumTotal, Plateau, Saba and more.

### **Can I use Raptivity output with our existing LCMS and live collaboration system?**

Yes. You can easily embed Raptivity output with your existing LCMS and Live collaboration system with absolutely zero efforts.

### **How soon will I be able to see return on my investment (RoI) for Raptivity?**

Case studies have shown that using Raptivity, you will realize your RoI in less than 40 days. Check out the interactive ROI calculator.

### **How can my flash programmers/ developers use the power of Raptivity?**

With MyRaptivity, you can create your own interaction models for Raptivity. This is how it works. Flash programmers develop interaction logic using Flash. Once done with this, they use MyRaptivity to ensure that it is possible to create variations of the interaction using Raptivity - without further programming, of course. This way, you leverage the Raptivity user base in your organization and save the time and effort required for communication, program changes, bug-fixes, recompilation and distribution.

### **Which educational institutes are using Raptivity?**

To name just a few: Michigan State University, University of Nebraska, West Virginia University, Mississippi State University, St. Joseph University, Florida State University, Providence College, Wichita State University are amongst those using the power of Raptivity. Please read the 'Raptivity Client List' for a complete list of clients.
