

FLOCKPOD PRO

FlockPod Pro Version

Ideal for organisation wide deployment with a footprint spanning thousands of users (2000 or more users), this version includes email support.

FlockPod Pro can be used in the following ways:

- Best suited to meet requirements for a wider audience such as PTS users, LMS buyers and big Projects
- Deploy FlockPod Pro as a social learning platform for any or all of its LMS-hosted courses across the company / department / university.
- Use FlockPod to co-ordinate the development and feedback of e-learning content with its internal customers, its staff, its SMEs and its outsourced vendors.
- Use FlockPod to maintain courses that are already deployed.
- Embed FlockPod into current courses and users and SMEs will start giving maintenance requests on the spot. These can be harnessed and a specification for course change created.
- Conduct On-the spot user surveys to understand how specific parts of a course are doing

Introductory Pricing

Block of max users	Price per month (US \$)	Free Pods	Cost of Additional Pods per month (US\$)
1000	600	200	3
